SUBJECT: BCDC Permit Application No. M89-80(M) for Levee Work  
at Buckler Point

Dear Mr. Taylor:

The staff has reviewed your permit application to place 50,000 cubic yards of materials on levees at the Annie Mason Point Duck Club (No. 801). To complete your application please provide the following:

1. Application Fee. The fee for an administrative marsh development permit is \$100. If the project involves levee maintenance only, it appears to qualify as an administrative permit. However, if the project involves the storage and drying out of dredged spoils in the wetland, prior to use for levee repairs, it may have to be a major permit. Please indicate whether any storage of dredged materials is proposed at the duck club.
2. Local Approval (Question Nos. 13 and 15). Please indicate whether a local discretionary permit is required from Solano County Public Works Department for this project. If so, we will need a copy of the permit, including an environmental determination, before we can file your application. If not, please ask the County to write us a brief letter stating that no discretionary permit is required.
3. Other Governmental Approvals (Question No. 14). Please indicate whether permits from other government agencies, such as the U.S. Army Corps of Engineers, is required for this project.
4. Project Details (Questions 15 through 25). Your application does not include sufficient details regarding the nature of the project. Please answer questions 15 through 25 of the application to provide more details. If a question does not pertain to your project, you can note "not applicable."

5. Site Plan (Exhibit 26). The site plan which you submitted with your application is not detailed enough. Please indicate the locations of the levee repair work and provide one or more typical cross sections of the levee (existing and proposed), including elevations.

Once we receive the above information we can file your application as complete. Please feel free to contact me should you have questions.

Very truly yours,

CHRIS PARRY  
Permit Analyst
